Had Hooked Up With Irish-American Radicals to Kill Centenary of American--British Peace.

Washington, Oct. 11.—Germany financed Irish-American propaganda organizations in the United States as early as 1909 to combat the newly developed movement for celebration of one hundred years of peace between America and Great Britain, President Wilson has learned from leaders in the centenary celegration.

John A. Stewart, of New York, chairman of the American branch of the centenary committee, who recently called at the White House with H. S. Perris, of London, a leader in the British phase of the movement, brought evidence that within five weeks after an announcement of the centerary plans early in 1909, German ary plans early in 1909, German and Irish-American interests in American Gunners Now in grounder and threw him out. McMulthe United States formed a number of associations and leagues to foster interest in German affairs. Most of these organizations, Mr Stewart informed the president, shortly became merged with the American GIANT MORTARS Truth society, whose president, Jeremiah O'Leary, was mentioned in the secret message to Count von Bernstorff from the German government, Getting Ready to Take a disclosed yesterday by Secretary Lan-

#### E. F. Thomson Becomes Fuel Superintendent of the

#### Monon.

The readers of The Sentinel will be interested in news of the advancement in railway work of E. F. Thomson, a former resident of the city, who has ust been appointed to the responsible office of fuel superintendent of the Monon railroad. The office is a new one on that system, created to meet the growing demands of the fuel question and the superintendent will have headquarters in Lafayette, where the main offices of the company are located. E. F. Thomson, known by his intimate friends as "Dick," lived in Fort Wayne over ten years. He came fere in 1902 from Logansport to take he office of time clerk in the Wabash hops. Soon afterwards he was called to the master mechanic's office as a stenographer for Chief Clerk Perry A. Thompson, and in 1911 he was summoned to Chicago as private secretary to George Yeoman, then assistant to President F. A. Delano. Soon afterrards Mr. Thomson was transferred in a similar capacity to the office of President Delano and when the latter resigned to take office with the govirnment, Mr. Thomson remained as the private secretary of President H. M. Kurrie. Last April he was trans ferred to Lafayette as assistant super intendent of motive power, from which pesition he retired October 1 to take up the duties of superintendent of fuel. E. F. Thomson has kept in touch with his friends in Fort Wayne through frequent visits to his brther, Mearl Thomson, a clerk in the Wabash master mechanic's office. Another brother is Machinist Earl Thomson of Toledo, formerly of this city.

#### FREIGHT CAR SPACE.

#### Forsyth Tells How Buyers Waste the Facilities.

How freight car space is wasted by buyers-not shippers-of commodities in bulk is shown by reports just received by D. I. Forsyth, vice chairman of the Chicago Car Service committee of the Railroads' War board. Less than 2 per cent of the freight

ears in the United States have a marked capacity of 50,000 pounds or less, vet 60 per cent of the total orders placed with shippers call for lots of 50,900 pounds or less. . In other words, over 98 per cent of

the freight cars could carry larger loads than shippers can put in them, because of weight restrictions imposed in 60 per cent of the orders placed by

The average carrying capacity per freight car is 80,000 pounds, but the average load per car today is hardly half as much, despite all efforts to secure more intensive loading.

Only 5 per cent of the freight cars in this country have a capacity of less than 60,000 pounds. Thirty per cent will carry 60,000 pounds; 35 per cent 80,000 pounds, and 30 per cent 100,000 pounds. Yet 80 per cent of the orders of buyers confine the loading of cars by shippers to 60,000 pounds or less. There is today and will be while the war lasts a demand for many more freight cars than the railroads can supply," said Mr. Forsyth. "The demand will increase but the number of cars cannot be increased to any appreciable extent in the near future. Shippers cannot send a buyer more than he orders. Therefore, the remedy for wastage of freight-car space lies mainly with buyers of commodities in bulk. They should quit using the car-destroying trade units established in the old days when cars were small and increase their orders in proportion to the increase in capacity

"Some shippers, realizing how overburdened the railroads are and how vital a factor they are in this awful war crisis, have refused to book orders when to do so would cause a waste of The railroads do not ask shippers to go that far, however; they merely ask to be permitted to join in efforts to meet the wishes of buyers, without the necessity of wasting car space; to urge the buyer to increase his order before insisting upon shipment. "When full loading to one consigned

#### FRANK THOMSON SCHOLARSHIP. Two Vacancies to Be Filled This Year.

Announcement is made by the general manager of the Pennsylvania railroad lines east and west of Pittsburg that arrangements have been made to hold examinations for the award of the Frank Thomson scholarships for the four-year Thomson scholarships for the four-year collegiate term, beginning with 1918-1919. Two scholarships will be vacant. One will be awarded to a son of a living or deceased employe of the lines of the Pennsylvania railroad east of Pittsburg and the other will be similarly applied

on the lines west. The examinations will be conducted by the college entrance examination board of New York city, and applications for examinations in localities east of the Mississippi must be received on or before May 27, 1918, and for those west of the Mississippi on or before May 20, 1918.

The Frank Thomson scholarships were established in 1907 by the children of the late Frank Thomson, formerly president of the Pennsylvania Railroad company, as a memorial to their father. The purpose is to permit the sons of living and deceased employes of the Pennsylvania railroad system to obtain technical educations which will qualify them for entering the railroad service. The trust fund sustains eight scholarships simul-

It seems to be indicated that the documentary evidence from which the von Bernstorff exposures have come were in the hands of the state department many months agolong prior to the breaking of diplomatic intercourse with Berlin last February. For instance, we have no doubt that President Wilson knew of Jeremiah O'Leary's alleged relations with the Berlin propaganda of destruction in the United States at the time last fall when he administered a stinging rebuke to that insolent egotist's presumption in attempting to lay his political coercions upon the White House. On that occasion President Wilson addressed these few pregnant words to Mr. O'Leary:

It is generally claimed that the consumption of a reasonably large quantity of unfermented grape juice improves digestion, diminishes intestinal Durable Dress fermentation, and results in an increase in body weight.

The nutrients in grape juice are the same as in other foods, and as the percentage of water is high, it resembles liquid foods more closely than solids. Carbohydrates are the principal nutritive ingredients.

Grape juice as a food is essentially a source of energy, and may help to make the body fatter, though it is of slight assistance in building nitrogenous tissue. Sugar in moderate quantities are wholesome foods, and grape ju're offers them in a diluted and palatable form. Moreover, the agreeable flavor increases the appetite, which is a consideration by no means unworthy

The following recipes prepared with unfermented grape juice in various ways have been thoroughly tested and found to please the taste of many

Grape Nectar. To 1 pint of grape juice add the juice of 2 lemons and 1 orange, 1 pint of water, and I small cup of sugar. Serve ice cold. If served from a punch bowl small slices of lemon and orange add to the appear-

ance of the beverage. Drink for Invalids. To 2 tablespoonfuls of grape juice in a wineglass add the beaten white of 1 egg and a little chopped ice, and sprinkle sugar over the top. This is often served in sanitariums.

Grape Punch. Boil together 1 pound of sugar and half a pint of water until it spins a spread; remove from the fire and when quart of grape juice. Let this stand cool add the juice of 6 lemons and 1 over night. Serve with plain water, Apollinaris water, or soda water.

Grape Sherbert. Mix 1 pint of grape juice, the juice of 1 lemon, and 1 heaping teaspoonful of gelatin dissolved in boiling water; freeze quickly; add the beaten white of 1 egg when almost frozen. This quantity is sufficient for eight persons.

#### Pocketless Uniform Awkward to Recruits

There is one-and perhaps only one -amusing thing in the spectacle of a young man in his first uniform; and that is his frantic and miserable state at the prospect of a pocketless future. What shall he do with his keys? Where shall he tuck his small change? How can he carry his handkerchief? And what on earth will he do with his hands? Uncle Sam does not permit breeches pockets in uniforms and though the seasoned soldier or naval officer has become accustomed to loing without, the new recruit or the newly commissioned officer is in a sad state of mind for a few days at least. #### BANANA FLOUR BREAD USED IN BRITISH WEST INDIES

Inhabitants of the British West Indies are eating banana bread, instead of bread made from wheat or rye, to make up for the shortage in foodstuffs. The bread is made from two parts of banana flour and one part of wheat flour, and agricultural experts say it is highly palatable. Full grown green bananas are peeled, sliced and fried or a galvanized sheet and the product ground in an ordinary corn mill. One pound of flour can be obtained from four pounds of the fruit, and the bread baked at a cost of about 3 cents a pound.--Capper's Weekly.

#### Country Club Gardens Attract a Variety of Appreciative Purchasers News of Our Neighbors

Wm. H. Scheiman, of the City and Suburban Building Co., which has prepared the Country Club Gardens, adjoining the grounds of the Fort Wayne Country Club on the west, makes an interesting statement concerning the opening of the lot sale there yesterday. The day opened with a drizzling rain, but this did not prevent the sale of a sufficient number of lots to prove that there is a general desire on the part of the people not only to secure tracts of fertile ground near the city for home sites but for cultivation and for investment.

"One interesting fact is revealed in the statement that seven lots were sold to the first four persons who saw the Country Club Gardens Wednesday morning," said Mr. Schieman. "One of these was a restaurant man, who, after he had seen the immense cabbages and potatoes produced there this year, doubtless recognized the value of the ground as a place to raise the vegetables for his place of business. Another lot was sold to a farmer who knows rich soil when he sees it and who declares the owner of such property can get his money back from the products of the soil in a short time. A third to buy was a stenographer, who found many points of attractiveness in the place. The fourth of the number who first purchased in Country Club Gardens is a commission man who selected four lots with the statement that they 'look good to him,' and will repay him well for his investment."

Country Club Gardens are bounded on the north by the Huntington road and on the south by the interurban line of the Fort Wayne and Northern Indiana Traction Co. Quick and frequent service on the traction line with a fare of about 6½ cents appeals to many who desire a home in the suburbs, while at the same time carrying on their work in town. The lots average 100x200 feet in size and are perfectly drained. The graveled streets will be lined with catalpa trees grown on the property.

The sale which opened vesterday will be continued in earnest during the next few days, and those desiring to see the property may apply to any salesman connected with the Fort Wayne Real Estate Board.

### MONASTERY HOME

# Martin Luther 400 Years Ago.

OPEN HOUSE AT WITTENBERG

Romance of Luther Recailed by the Four Hundredth Anniversary of the Reformation, Which is to Be Celebrated on Oct. 31-Luther and the

Children's voices and the merry sound of their romping feet echoed through the monastery halls. The monk had married a nun, and they were living in the monastery. The other monks had long since gone. Many of them had married, too. The monastery had become a home. The monk was a father; the nun a pure, good mother. Life was normal. Religion had cleansed it, not warped it. Martin Luther had married Katherine

It all came about in the course of events. When Luther found the true Gospel of faith and grace, the old idea of celibacy being holier than marriage disappeared. Luther did not marry at once; he did not find marriage holier in order to marry. He advised many others to marry and explained his views many times before that happened.

When Luther's teachings about the folly of monks and nuns shutting themselves up to peculiar observances spread through Germany many left the monasteries. Among them a young girl, Katherine von Bora, with several others fled to Luther. He cared for them until they found homes. Years after Katherine was still there. Most of the others had married. At last came the Luther marriage.

Nothing caused a greater sensation than that. But it was worth while to transform a monastery into a home. That laid the foundations for the Protestant parsonage, from which a long line of the most distinguished servants of mankind have come.

#### Table Talk

That was a busy home, too. Luther tolled incessantly lecturing, writing, preaching, caring for the church and building it up on the pure gospel. Katherine managed the home and property with discretion and success. It was not easy to do. Luther was generous in spending and giving. His home was the place many broken and discouraged men found shelter and inspiration.

Martin Luther. His Family and Me

lancthon. Young students, too, shared its hospitality, and the inevitable cousins and sister's sons who needed help came and shared fts genial good cheer.

The table was one to be remembered. Luther, his great face wreathed in smiles or his fine eyes flashing with interest and enthusiasm, sat at the head of the long line of students, guests, relatives and children down to his "Katle" at the foot. Awkward silence was unknown there. Some one always had something to say. It was a university education to sit there. Every topic was discussed. The discussion was enlivened and guided by a master, widely learned and deeply religious.

Luther was always full of social good cheer. He loved companionship. Even while he was fighting out his big fight at the university which led him into the monastery, his room was a popular place for his fellow students to congregate. His humor saved him many things a less joyful man would have succumbed to.

But his life was deep and serious. He was a wide and thorough student, a voluminous writer and a capable executive. Few men have done as much or as good work as he has done. He was never well in later years and suffered much, but always worked hard and kept good cheer. One of the best helps he had in all this was his good wife and their pleasant home. His children were a constant source of delight to him. Few men have understood children better than he. Few have been able to speak on their level as he has done.

Preserved Smith, perhaps the foremost Luther scholar in America, calls Luther a model husband and father: "Luther always spoke kindly both of his wife and to her. His letters are full of affection toward her. He thanked God for her as the best of all His gifts; he would not trade her for the dominions of France and Venice. To his friend Jonas he wrote that if Katle died he would never marry again. For his children Luther was a wise and loving father. It is true that he believed in more corporal punishment than most of us now do, but he spared neither care nor thought nor time on their education. The greatest sorrow of his life was the death of his daughter Magdalene."

### **BROOK VIEW IS A** STEP FAR IN ADVANCE

Even in West Brook View, Fifty Choice Lots Face a City Park.

Fort Wayne has at last awakened to the fact that it has always mistreated its streams, which Nature freely gave to be a blessing to the people. But this policy is at an end. Anyone who lays out a subdivision hereafter bordering on a stream will be referred to the plan followed in the north side Wildwood development-Brook View and West Brook View-as an example of perfect city planning in consideration of stream treatment. Formerly, it was the custom to lay out city property so that the backs of the lots bordered the stream. A "horrible example" of this obsolete method is to be seen at the south end of the new Harrison street bridge, where a group of wooden houses destroys the appearance of the river banks, despite the efforts of several stately trees to maintain an element of respectability. This is but one of many cases. In Brook View, on the other hand, one full mile of boulevard borders the banks of Spy Run brook. and a hundred choice lots front upon the boulevard, the park and the stream. Words cannot describe the beauty of the place which, if it had been platted in the years gone by, would have been utterly destroyed and the clear-water stream would have been converted into an unsightly open

Fifty of these new properties are in West Brook View, where lots are now being sold-lots which possess every modern improvement - pavements, sidewalks, ornamental boulevard lighting, water, sewers, electricity and gas, and where every attention will be given to the parkway by the city, which has just taken it in charge.

As a superlative attraction, the prices of some of these lots have been placed as low as \$650, while the average will not exceed \$900. As homesites and investments, it would appear that West Brook View offers unparalleled values. The Wildwood Companies have spared no pains to create here a most delightful home section,

By CHARLES EDWARD RUSSELL. The human race must certainly have a mixture of insanity in its make up. or it would never tolerate such an institution as monarchy.

The king business is at all times a grotesque and monstrous absurdity but in the case of Russia it was just one long delirium.

Take the Winter Palace at Petro grad, the place where we were quartered, for one symbol of this madman's dream. There never was a crazier thing in all the works of man's hand and it exactly expressed the institution it sheltered.

It is the largest permanent building in Europe. William G. I wasn't as far away from the entrance as some others

The Winter palace was begun by Catherine II., sometimes called the Great, and was about a hundred years in building. When the whole imperial machine was going it used to house 6.000 persons and was the largest madhouse in the world. Three thousand persons are said to have attended one ball held in the largest, of its three ball rooms.

### **BLACK WATCH** MEN MAY COME

Effort Made to Get One of Hero Highland Companies Here.

#### SPEAKERS NAMED FOR VILLAGE MEETINGS

Enthusiasm Marks the Start of Second Liberty Loan Campaign.

The famous Black Watch company of Canadian troops which marched into the terrain of death on the Flanders front earlier in the war and which tramped on until only a shred of the once formidable company was left may come to Fort Wayne in the interest of the second liberty loan effort.

Chairman C. H. Worden is trying to get the company here on either a week from Saturday or a week from Sunday It is understood that the organization will have an open date between Chicago and Pittsburg about that time. Both Fort Wayne and Indianapolis are

trying to secure the troop. The hero Montreal company is made up of forty perfectly trained men, only a shred of the band which made the memorable charge of death into the face of coughing machine guns and bursting hand grenades. There will be a band of forty pieces from the Loyal Grenadiers if the organization is brought here.

It is planned to have the company make a parade of downtown streets and to have the major of the organization to speak. The head of the company is said to be one of the best openair speakers of Canada. He has thrilled thousands durnig the brief tour of the

If the Black Watch troop is brought here the only expense for the liberty loan organization will be one meal for the men. The government is paying other expenses. C. H. Worden expects to hear from Chicago, where he has wired, within the next few hours concerning the probability of obtaining the noted company.

A great open air meeting will be held on the day that the Canadian heroes come to town, if they can be obtained. . Whether the loyal troops are secured or not there will be a great demonstration at the official opening of the bond sale

Harris, president of the First National bank of Champaign, Ill., and vice president of the Illinois state council of defense. Mr. Harris spoke before the annual convention of the Indiana Bankers' association in session here. In his address Mr. Harris discussed various phases and problems of the war dealing with the work of "feeding the war," financing the war, and the general attitude of the public toward the war. It should be relatively easy to feed and finance the war "if we all farm, finance or fight," he declared.

Makes Plea to Farmers.

Referring to the part of the farmer task that confronts our farmers, fighting famine and feeding liberty, and it is our duty and privilege to stand behind them and our boys." He continued to say the average farmer while a good crop farmer often does not grow the meat he should raise. The farm situation is such in the corn belt Mr. Harris asserted because of the percentage of tenant farmers that adequate results are not to be had unless there is close co-operation between landlord and tenant, above all in the meat and fertility campaign. The Only Cheap Things.

Mr. Harris continued: "Money and farm land, next to congressional oratory and advice are the only cheap things I think of today and this situation means much to the farmer, whose prices are excellent. Except for labor shortage, which threatens to upset many calculations and is more serious than is generally realized we farmers have less reason for complaint than any class of business. Our profits can go to liberty bonds, farm development and debt reduction."

### FIXED PARLOR AS **ZONE OF SAFETY**

Called Police When Hubby Would Extend Acts of Ruthlessness.

The parlor is the pride and joy of the Lyman Layton home, 1303 Winter street. It is the room where every polished bit of furniture is dusted with care. It is the sanctum in which reposes the family bible and the big red album. Mrs. Lyton is the self-appointed guardian of the cozy front room.

The husband lingered a bit too long above the burnished railings on Wednesday and came home a little unsteady, it was testified in police court, Thursday morning. He made a ruth less raid on the kitchen. He shattered every dish which reposed on the kitchen table. He smashed the face of the kitchen clock. He left the place in a state that would do credit to a German scouting party.

Ther he started for the parlor. "I didn't say anything as long as he stayed in the kitchen," Mrs. Layton

She called police when her husband made his way into the realm of enlarged pictures and gilt edged sea shells. Officers hurried to the home. There was the treading on numberless pieces of broken chinaware as the men crossed the kitchen floor. They arrested Layton on a disorderly conduct

charge. The husband is the father of five children and has been in Fort Wayne for seven years, he said. He promised to spend more of his time at home. He was released.

### HIGH SCHOOL TO BUY UNIFORMS AND GUNS

Edgar Fenton Writes That Warned Not to Get Copies of the Regulation In-

signia. The Fort Wayne high school is

planning on buying 100 uniforms and a like number of drill guns to be used in their military training. They have negotiated with a number of local firms about the purchasing of the uniforms. A representative of the school saw one of the posters published, warning the public to guard against the copying of the regular army uniform and called at the recruiting station. It was suggested to the repreuniforms be of a little darker shade of drab green, which is just as serviceable and perhaps a little better color than the regulation olive drab. It was also suggested that the English roll collar be used, which is more serviceable and comfortable than that used in the army uniforms. The buttons will probably bear the initials of the school.

Posters Torn Down. The recruiting posters, which were placed on the court house corner a few days ago, in some manner or form have been torn down, and it was not done by the wind. Several theories might be advanced as to the purpose of destroying the posters, but let it be sufficient to say that the local authorities have good information as to who the malefactor is, and should the practice continue the guilty party will be punished.

Sergeant Finan Leaves Sergeant Joe Finan, who has been t the local recruiting station for some time, has received orders to report Friday at the main office at Indianapolis. Sergeant Earnest Daetwiler, of Hartford City, has been transferred to the local office to take Sergeant Finan's place here.

Advices Sent by Gen. Pershing.

Washington, Oct. 11.-Courses for the great military schools at diviswhole scheme of the sixteen week

course to its minutest detail is based what General Pershing and his officers already have learned on the other side. It will be varied as new lessons are learned at the fighting front. The plan is calculated to produce infantry divisions uniformly arranged, equipped and trained. It will cut down materially the training time abroad. The first division to graduate from the home training school and reach France will need but a few weeks' additional instruction to fit it

for duty at the front. Will Learn Mechanism of Bifle.

For the first five weeks the men will learn all about the mechanism of the rifle, how to keep it clean, how to load, sight and fire; the theory of windage, elevation and the like. With the sixth week they will begin spending many hours a week battering away at targets of all sorts. While one platoon or company is firing, the others will be at work estimating distances to train their eyes, studying the use of fire control instruments range-finders' and observers' glasses Divisions having passed through the chooling will be remarkably effective in action, as every man retained will have had rifle work enough to make him a qualified marksman.

Plans for the Divisional Delegates to English Lutheran Meeting Unanimously in Favor of It.

> NINTH DISTRICT TO VOTE FAVORABLY

Intensive Work Laid Out on Convention Will End This Evening With Ordination Services.

At the meeting of the northern Indiana and southern Michigan district of the ional training camps have been general synod, which is in session at the mapped out as carefully as are those Christ Lutheran church on West Jefferhigh schools or colleges. The son street Thursday, it was voted unanimously to merge with the other branches of the church.

This proposition is to unite the three large divisions of the English Lutheran church, which separated at a meeting held at the Trinity Lutheran church of this city back in 1866. The district synod in session nere is the ninth unit out of the twenty-five district synods composing the general synod to vote on

the proposed merger. At the meeting Thursday morning a number of interesting and helpful talks were given by the Rev. Dr. Yarger, president of the board of church and of home missions; Rev. Dr. Charles S. Bauslin, general secretary of the board of education, and Mr. Weller, of the laymen. These men all spoke highly in favor of the joining of the three synods, namely, the general synod, the general council and the united synod of the south, as a greater means of promoting Lutheran efficiency.

Will End Tonight. The closing services of Thursday night are to be a very unusual treat. Three young men are to be ordained into the English Lutheran ministry, and as the liturgical service is to be used it will be well worth seeing. The financial report showed the synod the strongest it had ever been. Thirty-two churches reported an excess of their apportionment, while fifteen more had the full amount.

Celebrating Reformation. The convention of the Northern Indiana and Southern Michigan General Synod is celebrating the 400th anniversary of the Reformation. Many of the speakers have dealt at great length on the relation of the Reformation and Luther to present day condi-

tions. If below standard, they will ber of churches on the borders of the synod. There is an opening for at least ten churches in Detroit alone. A new church was opened there a few weeks ago. It was also decided to adopt a policy which would not allow boards or councils to be elected twice in succession. A movement was also eign missions. Along this line it was further specified that an attempt would be made to raise \$300,000 in the general synod for educational institutions in India.

One of the most interesting address. es of the meeting was delivered by the Rev. Dr. David H. Bauslin, dean of the Hamma Divinity school, Springfield Ohio, on the subject "Some Lessons from the Quadricentennial Reformation for Today." The speaker spoke first of the 400th anniversary and its relation to Christianity and civilization. He talked further on the supremacy of the scripture, and justification by faith alone, the universal priesthood of believers, which means that every man is a priest and king before God. He touched on the right of private judgment as fundamental to democracy and said that all the civil institutions of the country, such as the public schools, representative government, etc., had their origin in Luther's reformation. He closed with ar eloquent appeal for a revived popular and devotional study of the scrip-

Pioneer in Movement. Dr. Bauslin is one of the pioneers and hardest workers of the general synod on the plan of merging the three big divisions of the English Lutheran church. The plan as mentioned in Wednesday's Sentinel is to merge the three synods which separated at a previous meeting in Fort Wayne, held at the Trinity church during the year 1866. These three are: The General Synod, the Northern Indiana and Southern Michigan district meeting now at the Christ Lutheran church being a part of this General Synod, the General Council, and the United Synod of the south. A bit of Lutherar history shows that the rupture in the church occurred here in Fort Wayne as a result of a number of different tendencies coming to a crisis at this meeting. The discussions held at that time were friendly but nevertheless severe and the result was the division of the Lutheran synod into the two divisions: The General Synod and the General Council. The leading mer who were in favor of the break at that time were Dr. S. S. Schmucher Dr. J. A. Sprecher, Dr. W. A. Passvent Rev. Dr. J. A. Brown, and the Rev. Dr. upward revision was imperative to J. A. Seiss. All of these men are dead

#### Elevens of the "Big Ten" Will Give Flash of Form Saturday.

Chicago, Oct. 11 .- With practice games out of the way, football elevens of the "Big Ten" will face the first severe tests of the season in contests to be decided Saturday, Oct. 13. Every member of the Western Conference will get into action. Development has been rapid in almost all of the camps. and with the shortage of material generally felt, some close battles are ex-

The greatest interest is attached to the Ohio State-Northwestern game at Columbus as it will be the first clash between Big Ten teams this year and the loser will be eliminated from the championship. These two elevens fought it out for the Western Conference championship last fall, and Ohio annexed the honors. The Buckeye team is virtually as strong, if not stronger, this year. Critics believe it will be a certain contender for the title again as "Chick" Harley, an All-American selection, is playing with the same dash and speed which characterized his work last fall.

Northwestern, on the contrary, has been seriously weakened as a result of enlistments and injuries. Coach Fred Murphy was forced to build his squad around three or four veterans. Although the Purple team cleaned up on Lake Forest rather easily last Saturday, Murphy is not optimistic concerning the team's chances against Ohio, which, in its two early season games, has displayed high scoring

The clash between the University of Chicago and Vanderbilt at Stage field will be Chicago's first strat of the season. Vanderbilt usually has developed a team which usually made a strong bid for chamapionship honors of the south.

Little news has come from the Chicago camp since practice was started three weeks ago and the strength of the remarkably youthful squad is unknown. It is regarded as probable however, that Coach Stagg will start Higgins at fullback, Elton and Rouse in the halfback positions and Chappell day for the first time this season, meetor Blocki at quarter. The first two games played by Indiana indicate that Coach Stiehm has developed a "scrappy" eleven even with a shortage of material. The game was called off a week ago and then reinstated after St. Louis decided to go through with its schedule. Halfback Jevre, whose leg was damaged in the clash against Wabash, probably will be held in reserve until the Minnesota game.

Coach Richards, of Wisconsin, plans to send his heaviest players against Notre Dame Saturday. The Badgers failed to reveal much driving power against Beloit and critics believe defeat faces them unless a stronger attack is developed. Richards drove his charges through bruising scrimmages all week in an effort to overcome apparent weaknesses.

The Magazine Girls in Charles Dillingham's Production of Irving Berlin's New York Globe Theater Success, "Stop! Look! Listen!" to Be Given at the York Globe Theater Success, "Stop: Look! Majestic Next Saturday Matinee and Night.

#### AT THE MAJESTIC

"STOP! LOOK! LISTEN!"

Irving Berlin's Latest and Greatest Success

"Stop! Look! Listen!" a musical comedy in three acts and many changes of scenes, with music and lyrics by Irving Berlin and direct from the Globe theater, New York city, wil he presented at the Majestic next Sat urday, matinee and night.

"Stop! Look! Listen!" a title by the way taking several breaths to say, has been most handsomely produced. Several of its scenes, notably the sunny strand at Honolulu and the dainty spot down on the Greenway farm, are examples of the best. Not the least of the good things promised is the famous beauty chorus, which is a riot in the bathing melody entitled "Take Off a Little Bit More." in which the girls continue to comply with the request until, as the chorus puts it We Can't Take Off Any More."

the Winter Garden Revue, featuring Bill and Edith Adams and the Belle Sisters, with a typical Moore covey of beauties, the New Palace for the last portion of the week is offering a par ticularly alluring bill.

The Six Musical Mosses occupy an unique position in the musical world for these six artists, four girls and two men, are versatile to a degree without sacrificing skill in any branch of their musical endeavor. They play and sing equally well and with their quaint costumes and effective scenic proprties, the people put a world of punch into their offering.

Sweet Jane Barber and Jerome Jackson have a medley of good stuff. Jackson is an elongated comedian almost grotesquely thin, while Miss Jane

do not think she will be molested. To the men she told the entire story of her trips across the seas and her final leaving of O'Gee. She married Rietdorf in Troy, New York.

Authorities of Manhattan have been notified of the finding of the girl. Von Weinstein has been called back to New York. He has written Detective Sergeant Pappert since his return to the big city. To the Fort Wayne detective is given the credit for locating the much sought Virginia Coller.

It was when Weinstein notified Chicago detectives of the finding of Virginia Coller that the newspapers got hold of the story, which was promised to be kept a secret.

O'Gee is under arrest in New York. It is expected that a charge of violating the Mann act will be placed against him.

### RED CROSS TO PACK CHRISTMAS BOXES

Public is Asked to Remember Soldiers Now at

the Front. Every person in Fort Wayne is

asked to contribute to the Christmas boxes which the Red Cross will pack and ship to the American soldiers now in France. Five hundred boxes will be shipped from this city. Such articles as cigars, cigarettes, to-

bacco, hard candy, nuts, pocketknives, flashlights, handkerchiefs, writing tablets, envelopes, playing cards, small games, etc., will be suitable to send. Committees will call upon the manufacturers and wholesalers of such articles today. Greet them cheerfully and give liberally. It will raise the spirits of our boys across the water, and stimulate their morale to know that we who stay at home are think ing of them and doing for them. Let us send them some "good cheer" at the Christmas season; all good-hearted and patriotic citizens are requested to send in suitable articles for these Christmas boxes to Red Cross headquarters, East Berry street, as quickly as possible.

### **CLEARING HOUSE FOR** HOTELS OF NEW YORK

New York, Oct. 11 .- A hotel clear-

The congested condition of hotels here at certain times during the year, as during the present world's series, where visitors who failed to make reservations were unable to find accommodations without considerable trouble, led to the decision to organize the clearing house. Under the new arrangements the hotel keepers believe the troubles of the homeless sojourners in New York are at an end.

pump.
In approving the ordinance I would, however, advise and recommend that the ordinance be read the third time again and passed at your next meeting as the record shows that while there was unanimous account of the massage of the mous consent given to the passage of the ordinance as shown by the unanimous vote to suspend the rules there is not, however, to suspend the rules there is not, however, a unanimous vote recorded on the passage of the ordinance. This being the case, in order to avoid any controversy as to the validity of the contract that might possibly arise on account of the ordinance approving the same not being regularly passed, I would advise that a vote be taken again on the passage of the ordinance at the next meeting.

ical workman and fill the water tank from one of the frequent stations set in closets, where basins with running water give an inexhaustible suppry. then the electricity is turned on and the big circular brush begins the task of licking up the dust and dirt that is carried into the building by thousands of feet each day.

The brush is turned with a rotary motion, the most efficient in loosening dirt, and before the sprinkler is a tank of liquid soap and powder that distributes an even deposit. The man who manipulates the machine walks up and down the hall until no space. however remote, is left untouched. The machine has a hundred feet of cord attached to a spool which automatically winds and unwinds as it comes nearer to or goes farther from the socket to which it is attached.

After the powerful machine comes the second man with a mechanical squeegee, attached to a vacuum contrivance which pumps the water into a tank on the same machine. One does not imagine that the halls, which apparently are clean even before the scrubmen begin their work, have the amount of dirt from a day's deposit. that they actually have. The squeegees suck in gallons of water that one wouldn't hesitate to call "black," but after the inexorable scrubber has done its work, one could "eat off the floor" with a merry relish.

Behind the squeegee comes one of the homemade mops. An enormous affair that a woman would lift with no little effort. It is wielded by the hands of a strong man in the final drying off of the wet marble floors.

Vacuum Cleaning.

Inside the offices the charwomen are, with the true housekeeper's instinct, setting things to rights. With cloths and a liquid preparation, furniture is being made like new, waste paper baskets are being emptied, trash removed, desks cleared off, and with a vacuum cleaner on the rugs and a mop on the tiled floors things soon become neater, quite, than any pin.

The vacuum force is generated by plants in the basement of the building. There are four plants altogether and each is capable of maintaining four machines at one time, so that sixteen cleaners may be used at the same time. Each machine has 100 feet of hose attached, and ten outlets or connection tubes are installed on every floor, which enables the markine to be used in every corner of the whole

The nightly duties of each of the charwomen is the cleaning of one station, or approximately twenty offices She has a key that will open every door in her station, which eliminates the carrying about with possible loss of many keys, and a waste of time in the process of fitting the individual key to its own lock.

After a thorough cleaning, the windows are lowered and the lights extinguished, and a report on every room entered is handed into the office of the

building manager. At 9 o'clock, when the curfew warns the little ones that bedtime has come and the town should settle down to nature's sweet sleep, the buzz of the vacuum cleaners dies, the twinkle of lights fades, the clatter of pails ceases, doors are locked and keys are once more hung in their cabinet up in the penthouse. In the women's locker room there is a hurried changing of clothing and, all the while a buzzing of voices as the charwomen discuss their adventures in the offices of industrial kings. The supply rooms are closed and the force of workers trail out into the night.

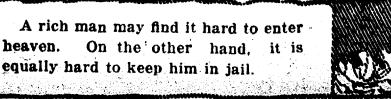

In the building, however, the swish of water on marble floors may still be heard, the chug-chug of the squeezas following close after. as it gulps up the dirty water, and the thud of the huge mops thumping against the flor.

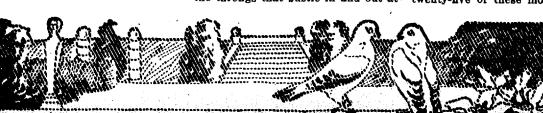

These strange noises, so unfamiliar to the tenant in the day, continue to echo through the empty building hour after hour. A corridor is pronounced "clean" and the freight lift draws up level to the threshold to carry the trio of men with their mechanical worker

### **FOOD CONTROL** TO BE A FACT

Government's Hand is Now Laid Upon Nation's Staple Edibles. RIGORS ARE SOON TO BECOME ACTUAL

#### Foodstuffs to Be Licensed by the Government at Washington.

Washington, Oct. 11.—The machinery of the food administration was set in motion today to complete preparations for government control on November 1 of twenty of America's principal foodstuffs.

Authority to assume supervision over the leading articles of diet is vested in Herbert Hoover by a proclamation of President

Under the terms of the order, licenses will be required for the manufacture, storage, importation and distribution of flour, bread, rice, staples, vegetables and other stipulated commodities. Farmers and small dealers specifically are exempted.

Decision to extend government control to the food stuffs named was founded on determination to prevent unusual profits and eliminate hoarding and speculation.

Government control of foodstuffs is extended to take in virtually all the essential articles of diet by a proclamation issued last night by President Wilson directing the food administration to license, after Nov. 1, the manufacture, storage, importation and distribution of some twenty prime commodities. coal operators, railroad representatives and others the naval administration announced the first of a series of orders to distribute coal on a priority basis and regulate the movement of coal cars.

The order provides that the Pennsylvania railroad serving about 700 mines shall have its needs properly taken care of. Similar orders for other railroads will be issued while orders for the distribution of commercial coal giving preference to the government domestic users, public utilities and all commercial organizations using coal, in the order named, will be given later. Complaints had been made by operators that the Pennsylvania railroad was confiscating commercial coal consigned to dealers after being required to hold coal cars longer than necessary in regular business. This resulted in today's order requir ing all producers along the Pennsylvania lines to contribute pro rata to the fuel needed for its operation at the government price. The requirements in some instances will interfere with delivery of full contracted con-

signments. The fuel administration says the railroads must be kept running. It suggests that operators withhold coal from persons or corporations needing it least and that they attend to the supply of other railroads than the Pennsylvania. The coal needed for the government must not be interfered with and the fuel administration intends to care carefully for domestic users and make special priority orders in special cases. Munitions plants and firms manufacturing necessaries of life will come into the priority order class.

### GERMAN NAVAL REVOLT WAS SERIOUS AFFAIR

Kaiser Orders Each Seventh Man in Uprising to Be Executed.

London, Oct. 11.-The revolt on the German high seas fleet at Wilhelmshaven was widespread and involved the crews of at least four battleships of the first line.

A dispatch from Amsterdam says one of these ships was the 18,600 ton Westfalen. The crew threw the captain overboard and he was drowned. The crew then landed to force their demands for peace. Marines refused to fire on them, whereupon soldiers surrounded the sailors, who surren-

Try to Reach Norway. Another Amsterdam dispatch tells of mutiny on the German warship Nurnberg, which was at sea. The men seized the officers and proceeded in the direction of Norway, with the inten-tion of being interned. The Nurnberg was overtaken by destroyers and

forced to surrender

Emperor William went to Wilhelmhaven and ordered that one out of every seven mutineers be shot. Chancellor Michaelis protested, with the result that only three were shot. Heavy sentences were imposed on the others. The chancellor's objections to the imperor's order that one mutineer in every seven be shot was on the ground that he could not assume responsibilbefore the reichstag.

Several mutinous outbreaks also are reported to have occurred among soldiers at the front, the dispatch adds. but these were not of such a grave

Admiral Blames Radicals. In announcing the plot to the reichstag, Vice Admiral von Capelle, the dnister of marine, is quoted in a Ber-

in dispatch as saying: "It is, unfortunately, a sad fact that the Russian revolution turned the heads of some persons in our navy and introduced revolutionary ideas among them. Their insensate plan was to recruit representatives on all the ships to cause the crews to refuse to obey orders, to paralyze the fleet, and force peace upon the country.

"It is proved that the principal agitator conferred in this building with the Independent Socialist faction in the reichstag, explained his plans to Deputies Dittman, Haase and Vogtheer, and obtained their approval.

Suffered the Penalty. "I cannot make a statement here on the subsequent events which occurred in the navy. The few persons who forgot their honor and their duty suffered the penalty which they deserved. I can only say that the rumors which are in circulation are immensely exaggerated. ### **MILLERS ANNOUNCE ADVANCE IN WHEAT**

Other Prices Remain About the Same—Busy Day at the City Scales.

The long expected raise in wheat prices were announced today by Fort Wayne millers with \$2.07 as the top price. Thursday was a busy day at the city scales, a total of forty-one loads being re-

ceived. Four loads of corn were weighed

more than has been delivered to the city in several days. The price was much lower than for three or four days, the price being \$1.75@1.76. Twenty-six loads of hay were bought for \$17.50 to \$19.00, and eleven loads of oats at 58@60c. There was no great changes in prices on city market Thursday. While there were not as many farmers as usual, there was a great variety of garden truck and produce. Many of the farmers were sold en-

### LEAGUES FORMED TO FOSTER GERMANISM

Washington, Oct. 11.—Germany financed Irish-American propaganda organizations in the United States as early as 1909 to combat the newly developed movement for celebration of one hundred years of peace between America and Great Britain, President Wilson has learned from leaders in the centenary celegration.

John A. Stewart, of New York, chairman of the American branch of the centenary committee, who recently called at the White House with H. S. Perris, of London, a leader in the British phase of the movement, brought evi dence that within five weeks after an announcement of the centenary plans early in 1909, German the United States formed a muniber of associations and leagues to foster interest in German affairs.

Most of these organizations, Mr. Slewart informed the president, shortly became merged with the American GIANT MORTARS Truth society, whose president, Jeremiah O'Leary, was mentioned in the secret message to Count von Bern-

One of the activities of the organization was to erect elaborate monuments over the graves of prominent German-Americans and to give pub-

Polo Grounds, New York, Oct. 11.—The New York Giants toppled over the Chicago White Sox today by a score of 5 to 0 and the world's series now stands at evens, both clubs having won two games each.

Ferdinand Schupp, the Giants' southpaw, duplicated Rube Benton's shut-out performance of yesterday by plastering the American league champions with a second coat of whitewash. Benny Kauff broke out in a rash of home runs, driving out two circuit crashes.

The story of the White Sox's downfall is told in the following

# FORT WAYNE MAN

#### E.F. Thomson Becomes Fuel Superintendent of the

Monon.

The readers of The Sentinel will be interested in news of the advancement in railway work of E. F. Thomson, a former resident of the city, who has dust been appointed to the responsible office of fuel superintendent of the Monon railroad. The office is a new one on that system, created to meet the growing demands of the fuel question and the superintendent will have headquarters in Lafayette, where the main offices of the company are located. E. F. Thomson, known by his intimate friends as "Dick," lived in Fort Wayne over ten years. He came here in 1902 from Legansport to take the office of time clerk in the Wabash shops. Soon afterwards he was called to the master mechanic's office as a stenographer for Chief Clerk Perry A. Thompson, and in 1911 he was sum-moned to Chicago as private secretary to George Yeoman, then assistant to President F. A. Delano. Soon afterwards Mr. Thomson was transferred in a similar capacity to the office of President Delano and when the latter resigned to take office with the government, Mr. Thomson remained as the private secretary of President H. M. Kurrie. Last April he was transferred to Lafayette as assistant superintendent of motive power, from which position he retired October 1 to take up the duties of superintendent of fuel. E. F. Thomson has kept in touch with his friends in Fort Wayne through frequent visits to his brther, Mearl Thomson, a clerk in the Wabash master mechanic's office. Another brother is Machinist Earl Thomson. of Toledo, formerly of this city-

FREIGHT CAR SPACE.

Foreyth Tells How Buyers Waste the Facilities.

How freight car space is wasted by buyers-not shippers-of commodi-ties in bulk is shown by reports just received by D. I. Forsyth, vice chairman of the Chicago Car Service committee of the Railroads' War board. Less than 2 per cent of the freight cars in the United States have a marked capacity of 50,000 pounds or less, yet 60 per cent of the total orders

placed with shippers call for lots of 50,000 pounds or less. In other words, over 98 per cent of the freight cars could carry larger loads than shippers can put in them. because of weight restrictions imposed in 60 per cent of the orders placed by

The average carrying capacity per freight car is 80,000 pounds, but the average load per car today is hardly half as much, despite all efforts to secure more intensive leading.

Only 5 per cent of the freight cars in this country have a capacity of less their new duties. than 60,000 pounds. Thirty per cent will carry 60,000 pounds; 35 per cent \$0,000 pounds, and 30 per cent 100,000 pounds. Yet \$0 per cent of the orders of buyers confine the loading of cars

by shippers to 60,000 pounds or less. "There is today and will be while the war lasts a demand for many more freight cars than the railroads can supply," said Mr. Forsyth. "The demand will increase but the number of cars cannot be increased to any appreciable extent in the near future. Shippers cannot send a buyer more than he orders. Therefore, the remedy for wastage of freight-car space lies mainly with buyers of commedities in bulk. They should quit using the car-destroying trade units established in the old days when cars were sinall, and increase their orders in proportion to the increase in capacity

"Some shippers, realizing how overburdened the rallroads are and how vital a factor they are in this awfut ple and was, a decided thanclal and war crisis, have refused to book orders when to do so would cause a waste of cars. The railroads do not ask ship. pers to go that far, however; they merely ask to be permitted to join in efforts to meet the wishes of buvers. without the necessity of wasting car space; to urge the buyer to increase his order before insisting upon shipment.

FRANK THOMSON SCHOLARSHIP.

Iwo Vacancies to Be Filled This Year

Announcement is made by the general manager of the Pennsylvania railroad lines east and west of Pittsburg that arrangements have been made to hold examinations for the award of the Frank Thomson scholarships for the four-year collegiate term, beginning with 1918-1919. Two scholarships will be vacant. One will be awarded to a son of a living or deceased employe of the lines of the Pennsylvania railroad east of Pittsburg and the other will be similarly applied on the lines west.

The examinations will be conducted by the college entrance examination board of New York city, and applications for examinations in localities east of the Mississippi must be received on or before May 27, 1918, and for those west of the Mississippi on or before May 20, 1918.

The Frank Thomson scholarships wer established in 1907 by the children of the late Frank Thomson, formerly president of the Pennsylvania Railroad company, as a memorial to their futher. The purpose is to permit the sons of living and deceased employes of the Pennsylvania railroad system to obtain technical educations which will qualify them for entering the railroad service. The trust fund sustains eight scholarships simultaneously.

### CANADIANS STRIKE TERROR TO GERMANS

SYRUP OF FIRS Uncle Sam's Lads Will Do as Well-Sign "Let Up"

Put on Trenches.

Special Correspondence from C. C. Lyon, Daily Sentinel Reporter with General Pershing's Army in France. With the American Troops in France.-(A. E. F., passed as censored. - F. Palmer, major)-After quainted with Canadian fighters over here, I'm more convinced than ever that our own United States troops are going to strike terror in the hearts of the Germans when they get into action.

Of all the troops now fighting under the British colors, the Canadians are acknowledged to have the biggest punch.

Their attacks on German trenches are the most violent, their marksmanship is the most deadly, and ir hand-to-hand fighting at least two Germans are necessary to take care of one Canadian.

Now, stand a soldier from Canada and one from the United States alongside each other and they are as much

alike as two peas.

They also speak the same baseball jargon and use the same slang.

If the Canadian, who was of a peace-loving, inoffensive disposition before the war, given over entirely to civil pursuits, has been able to develop himself into the greatest fighter in all Europe, who will say our own troops can't accomplish the same re-

Around Paris cafes, where nonfighting Americans idle away a lot of time trying to determine just what the Washington government should and should not do, conversation after this fashion is often heard:

"You must remember that we are women is that the average woman's going up against an entirely new game. neck is larger than it used to be, It remains to be seen whether our men can stand the gaff that the Germans will give them.

"The German soldier is a mere ma chine; he never thinks for himself he does what he's told to do: if he re-

"American troops can't be handled after that fashion because the average American soldier does a lot of thinking for himself. At the same time he hasn't generations of iron military discipline in his make-up."
Our friends just across our north-

ern boundary in America have upset all calculations in this respect. They haven't tried to follow either the English or the French style of

fighting. Iron discipline is unknown in their rank, and a Canadian officer in re-turning a salute, thinks nothing of throwing in a little conversation for good measure, such as "How are you today, lad?"

The Canadians are a free and easy lot, fuil of pep and sportsmanship, and thoroughly convinced that their German antagonists are blockheads. A highly prized trophy held by one regiment of Canadians now in Flanders consists of a large piece of white pasteboard nailed on a stick. On the board, crudely painted by some German who understands English, is this

appeal: Notice, Yanks! You were opposite us on the Somme. We're tired out. For God's sake keep quiet up here and give us a rest!

The Canadians' answer was to raid the German trench that very night and bring the sign back with them to their own trench.

A lot of boys from the United ranks, having joined long before our country entered the war. At random I nick out a counte and tell what kind

of fighters they are. There's Billy --- from Rochester,

On another occasion, after a Ger man trench had been captured, Billy located an enemy machine gun that was firing on his crowd from the rear. Jumping from one shell hole to another, he got to cover within 30 yards of the gun, and from his hiding place he threw bombs, killing and wounding some of the Germans. He then rushed forward, overcoming and bayoneting five surviving gunners.

"I'm mighty keen for the American boys in our outfit," a Canadian officer told me. "They're regular devils when they get into action. They use their brains every minute, too."

#### WOULD BE INTERESTING TO KNOW.

It would be of immeasureable interest to the people of the United States to know how long the evidences of German perfidy have been in possession of the state department at Washington. We hope that it may be possible disclose this, if it can be done without harm to national welfare and without involving its acquisitions in embarrassment.

It seems to be indicated that the documentary evidence from which the von Bernstorff exposures have come were in the hands of the state department many months agolong prior to the breaking of diplomatic intercourse with Berlin last February. For instance, we have no doubt that President Wilson knew of Jeremiah O'Leary's alleged relations with the Berlin propaganda of destruction in the United States at the time last fail when he administered a stinging rebuke to that insolent egotist's presumption in attempting to lay his political coercions upon the White House. On that occasion President Wilson addressed these few prognant words to Mr. O'Leary:

Your telegram received. I would feel deep-I mortified to have you or anybody like you vote for me. Since you have access to many disloyal Americans and I have not, I will ask you to convey this message to them.

That was the difficulty that President Wilson and Secretary Lansing had to deal with all the time. There was never a moment when German intrigue and Prussian dishonor were provocations and plotting against our neutral-

All the disloyalty, opposition and obstruction developed against this righteous war is not honest and sincere. Much of it is mercenary, corrupt and sordidly treasonable. To find out who is in the pay of the Berlin govemment will not be likely to encounter diffi culties that are insuperable when undertaken by the same agencies that have been able to unmask so much of the intrigue and perfidy of Prussian diplomacy in other capitals as well as in our own. To lay hands on them will be a happy event. Bolo Pasha had a for the state department at no distant time to | million and a half with which to corrupt a French minister of government. ### HELPING TO WIN

By GEORGE ADE.

Prepared for the Indiana Council of

Defense. Assuming that this letter is now beng read by some boy or girl old enough to go to school but still young enough to be called a "kid" (by those who don't now any better), let us begin by asking the question, "Is it wrong to fight?"

Every boy or girl with civilized par ents can answer that question. It is not to be answered by "yes" or

If we say "yes," we admit at once that our old friends, George Washington and U. S. Grant, were deprayed characters, because they fought and then kent on fighting.

If Buffalo Bill once upon a time rode out across the plains and same upon a hand of Indians attacking a settler's cabin and went dashing up with his that chased the German that obeyed scouts and killed a fow redskins, is there any boy in the world who would the world can go back to housekeepgo back on Buffalo Bill and pick out ing. some quiet, elderly real estate dealer as a substitute hero?

It's too foolish to talk about. Suppose we say it is not wrong to fight. Then we remove all blame from the Indians that Buffale Bill killed and we find outselves so mixed up that probably we had better back up and

lake a new start. In answer to the question, "Is it wrong to fight?" there can be but one sensible reply, as follows: "It all de-

nends. Suppose a boy of 14 is walking along the street with his sister and the neighborhood bully swaggers around the corner and pushes the boy up against a fence and cuffs him alongside the head and then tries some insulting familiarities with his sister, and suppose the boy who is thus humiliated and whose elster is in tears suddenly remembers that he has been

Then he would get a few more cuffs for good measure, and his sister would be ashamed of him and he would be ashamed of himself and the little rowdy who attacked him would call himself cock of the walk and be greater nuisance than ever before.

What is the next congress to do?

First, it will clean up any loose ends of the war program. If it appears that a billion or two dollars is needed for any forgotten purpose, it will be authorized.

The question may become acute as to whether to declare war on Austria-Hungary. KEEP POLISHED UP.

New Device Makes Shining Your Own Shoes an Easy Matter.

A new thing on the market and one which enables everyone to keep shoes polished is a device that fastens to any wall, always within easy reach, and shoes can be polished on it in a jiffy. No need to pay out 10c for a shine any more, as the cost of the device will more than pay for itself in a short time. Two sizes of lasts, come with the outfit, and any shoes can be shined on it, children's, ladies' or men's. It's all metal, holds the shoe perfectly rigid, making polishing easy A picture of the shoe-shiner is reproduced in another part of this paper. It is generally claimed that the consumption of a reasonably large quantity of unfermented grape juice improves digestion, diminishes intestinal Durable Dress proves algestion, and results in an increase in body weight.

The nutrients in grape juice are the same as in other foods, and as the per centage of water is high, it resembles liquid foods more closely than solids. Carbohydrates are the principal nutritive ingredients.

Grape juice as a food is essentially a source of energy, and may help to make the body fatter, though it is of slight assistance in building nitrogenous tissue. Sugar in moderate quantities are wholesome foods, and grape ju're offers them in a diluted and palatable form. Morcover, the agreeable flavor increases the appetite, which is consideration by no means unworthy of attention.

The following recipes prepared with unformented grape juice in varions ways have been thoroughly tested and found to please the taste of many people:

Grape Nectur.

To 1 pint of grape juice add the juice of 2 lemons and 1 erange, 1 pint of water, and I small cup of sugar. Serve ice cold. If served from a punch bowl small slices of lemon and orange add to the appear ance of the beverage.

Drink for Invalids.

To 2 tablespoonfuls of grape juice in a wineglass add the beaten white of I egg and a little chopped ice, and sprinkle sugar over the top. This is often served in sanitariums. Grape Punch.

Boil together I pound of sugar and half a pint of water until it spins a spread; remove from the fire and when quart of grape juice. Let this stand I pur sucural a to solat out ppr too-over night. Serve with plain water, Apollinaris water, or soda water, Grape Sherbert.

Mix 1 pint of grape juice, the juice of I lemon, and I heaping teaspoonful of gelatin dissolved in boiling water; freeze quickly; add the beaten white of 1 egg when almost frozen. This quantity is sufficient for eight persons.

### CHANGES MADE IN HEAD OF ART SCHOOL

Homer G. Davisson Resigns and Three Persons Are Named to Succeed Him.

Owing to pressure of a new line of work in which he has become ongaged, Homer G. Davisson, who has conducted the Fort Wavne School of Art with marked success for several ears, has resigned his position.

At a meeting of the board of the school held on Wednesday evening, Mr. Davisson's resignation was accepted and Miss Katherine Wagenhals Miss Edith Hughes and Miss Gladys Hughes were appointed in his place Both Fort Wayne and the Art school are fortunate in having anyone se well fitted to do the work of the school as the Misses Wagenhals and Hughes. Each of the three young women has devoted years of study to are work and under the best instructors. Miss Wagenhais opened a studio here about four years ago, following her study in Paris, and considerable time in New Fork city under Herter, in mural decorating, and in portraiture with prominent artists of the same city. Miss Wagenhals took an art association prize a year ago at the exhibit of artists in Indianapolis and portraits from her brush of local people have receiv ed much praise.

Both of the Misses Hughes were graduated from Pratt university. Brooklyn, in the normal departmen of applied design, and Miss Gladys Hughes taught for three years in the school immediately following her completion of the course. Miss Edith Hughes went to the Boston Museum of Fine Arts, then to Pratt and then to Parls. On her return kome Miss Hughes also spent some time with Herter, of New York, and she made a continued study of craft work, and their success is well known in art cir

#### Use Economy Even In Art of Brewing Tea

All that one needs to make good to poured on the leaves, which should moments, when the liquor must be poured off. That sounds easy and it is gun to carry and when off duty he all there is to it: it is astonishing how seldom this simple formula is followed out in actual practice. The housewife's most common mistake is to use water at a temperature below the boiling point. No matter how choice the tea if the water is not at boiling temperature the important constituents of the leaf are not dissolved

Now that everybody is talking econ omy it is a good time to call attention to the waste caused by using water be low the boling point. To prove that one can waste in making tea get two grades, one a very cheap tea and the tea with boiling water and the better sample with water below the boiling result, but the taste will convince you that boiling water drawn off cheap tea makes a better drink than is possible to brew with water which is not boiling even when the tea itself is of good quality.

BANANA FLOUR BREAD USED IN BRITISH WEST INDIES

Inhabitants of the British West indies are eating banana bread, instead of bread made from wheat or rye, to make up for the shortage in foodstuffs. The bread is made from two parts of banana flour and one part of wheat flour, and agricultural experts say it is highly palatable. Full grown green bananas are peeled, sliced and fried on a galvanized sheet and the produc ground in an ordinary corn mill. One pound of flour can be obtained from four pounds of the fruit, and the bread baked at a cost of about 3 cents : pound.-Capper's Weekly.

### QUOTA FOR ALLEN COUNTY IS \$5,013,200 As a result of the death of the father of Sherman L. Love, of Summitville,

Amount is Specified in Letter from Liberty Loan Executive Committee.

The Alien county quota for the second liberty loan is \$5,013,200, it is announced by the liberty loan executive committee, in a letter to Chairman Worden, and which was read before the county executive committee Wednesday night.

The letter to the local workers from the liberty loan executive committee follows:

"The secretary of the treasury has equested us to secure subscriptions of \$700,000,000 to the second liberty loan within the seventh federal re-serve district. This amount is substantially \$50 for each of the 14,000.-000 inhabitants of the district and inst in excess of 14 per cent, of its combined banking resources.

"In order that this quota may be ratably spread over all the district. we have apportioned this \$70,000,000 by counties, on a basis which takes into account both population and banking wealth in equal proportion.

### Country Club Gardens Attract a Variety of Appreciative Purchasers News of Our Neighbors

Wm. H. Scheiman, of the City and Suburban Building Co., which has prepared the Country Club Gardens, adjoining the grounds of the Fort Wayne Country Club on the west, makes an interesting statement concerning the opening of the lot sale there yesterday. The day opened with a drizzling rain, but this did not prevent the sale of a sufficient number of lots to prove that there is a general desire on the part of the people not only to secure tracts of fertile ground near the city for home sites but for cultivation and for investment.

"One interesting fact is revealed in the statement that seven lots were sold to the first four persons who saw the Country Club Gardens Wednesday morning," said Mr. Schieman. "One of these was a restaurant man, who, after he had seen the immense cabbages and potatoes produced there this year, doubtless recognized the value of the ground as a place to raise the vegetables for his place of business. Another lot was sold to a farmer who knows rich soil when he sees it and who declares the owner of such property can get his money back from the products of the soil in a short time. A third to buy was a stenographer, who found many points of attractiveness in the place. The fourth of the number who first purchased in Country Club Gardens is a commission man who selected four lots with the statement that they 'look good to him,' and will repay him well for his investment."

Country Club Gardens are bounded on the north by the Huntington road and on the south by the interurban line of the Fort Wayne and Northern Indiana Traction Co. Quick and frequent service on the traction line with a fare of about 61/2 cents appeals to many who desire a home in the suburbs, while at the same time carrying on their work in town. The lots average 100x200 feet in size and are perfectly drained. The graveled streets will be lined with catalpa trees grown on the property.

The sale which opened yesterday will be continued in earnest during the next few days, and those desiring to see the property may apply to any salesman connected with the Fort Wayne Real Estate Board.

DISCUSS MAYL PROBLEMS. Postmasters of County Seat Offices in Eleventh District Meet.

Hartford City, Ind., Oct. 11.-L. G. Trixler, of Huntington; Oscar Brad-ford, of Marion; George B. Davis, of Logansport, and Ellis S. Rees, of Winamac, postmasters of their respective cities, were here yesterday as the guests of E. E. Cox, the local postmaster. It was one of the occasional meetings by the postmasters of the Eleventh congressional district of ladiana, in which they consider matters pertaining to the duties of their offices. The principal matter of discussion Tuesday was a new ruling that has recently been put into effect by the postoffce department making the county seat postoffices the supply depots for the smaller offices of the district. The new ruling causes considerable additional work and the matter was taken up with a view to arriving at an understanding as to how best to handle the new order.

#### MONASTERY HOME

### TO PRACTICE | First Parsonage Established by Martin Luther 400 Years Ago.

#### OPEN HOUSE AT WITTENBERG

Romance of Luther Recalled by the Four Hundredth Anniversary of the Reformation, Which is to Be Celebrated on Oct. 31-Luther and the Children.

Children's voices and the merry sound of their romping feet echoed through the monastery halls. The monk had married a nun, and they were living in the monastery. The other monks had long since gone. Many of them had married, too. The monastery had become a home. The monk was a father; the nun a pure, good mother. Life was normal. Religion had cleansed it, not warped it. Martin Luther had married Katherine von Bora.

It all came about in the course of events. When Luther found the true Gospel of faith and grace, the old idea of celibacy being holler than marriage disappeared. Luther did not marry at once; he did not find marriage holier in order to marry. He advised many others to marry and explained his views many times before that happened.

When Luther's teachings about the folly of monks and nuns shutting themselves up to peculiar observances spread through Germany many left the monasteries. Among them a young girl, Katherine von Bora, with several others fled to Luther. He cared for them until they found homes. Years after Katherine was still there. Most of the others had married. At last came the Luther marriage.

Nothing caused a greater sensation than that. But it was worth while to transform a monastery into a home. That laid the foundations for the Protestant parsonage, from which a long line of the most distinguished servants of mankind have come.

#### Table Talk.

That was a busy home, too. Luther toiled incessantly lecturing, writing, lot 194 and s 25 ft lot 193, Fletcher's add, preaching, caring for the church and Wm. H. lancthon

Young students, too, shared its hospitality, and the inevitable cousins and sister's sons who needed help came and shared its genial good cheer.

The table was one to be remembered. Luther, his great face wreathed in smiles or his fine eyes flashing with interest and enthusiasm, sat at the head of the long line of students, guests, relatives and children down to his "Katie" at the foot. Awkward slience was unknown there. Some one always had something to say. It was a university education to sit there. Every topic was discussed. The discussion was enlivened and guided by a master, widely

learned and deeply religious. Luther was always full of social good cheer. He loved companionship. Even while he was fighting out his big fight at the university which led him into the monastery, his room was a popular place for his fellow students to congregate. His humor saved him many things a less joyful man would have succumbed to.

But his life was deep and serious. He was a wide and thorough student, a voluminous writer and a capable executive. Few men have done as much or as good work as he has done. He was never well in later years and suffered much, but always worked hard and kept good cheer. One of the best helps he had in all this was his good wife and their pleasant home. His children were a constant source of delight to him. Few men have understood children better than he. Few have been able to speak on their level as he has done.

Preserved Smith, perhaps the foremost Luther scholar in America, calls Luther a model husband and father: "Luther always spoke kindly both of his wife and to her. His letters are full of affection toward her. He thanked God for her as the best of all His gifts; he would not trade her for the dominions of France and Venice. To his friend Jonas he wrote that if Kntle died he would never marry again. For his children Luther was a wise and loving father. It is true that he belleved in more corporal punishment than most of us now do, but he spared neither care nor thought nor time on their education. The greatest sorrow of his life was the death of his daughter Magdalene."

### **BLACK WATCH** MEN MAY COME

Effort Made to Get One of Hero Highland Companies Here.

SPEAKERS NAMED FOR VILLAGE MEETINGS

Enthusiasm Marks the Start of Second Liberty Loan

. Campaign.

The famous Black Watch company of Canadian troops which marched into the terrain of death on the Flanders front earlier in the war and which tramped on until only a shred of the once formidable company was left may come to Fort Wayne in the interest of the second liberty loan effort.

Chairman C. H. Worden is trying to get the company here on either a week from Saturday or a week from Sunday. It is understood that the organization will have an open date between Chicago and Pittsburg about that time. Both Fort Wayne and Indianapolis are trying to secure the troop.

The hero Montreal company is made up of forty perfectly trained men, only a shred of the band which made the memorable charge of death into the face of coughing machine guns and bursting hand grenades. There will be a band of forty pieces from the Loyal Grenadiers if the organization is brought here.

It is planned to have the company make a parade of downtown streets and to have the major of the organization to speak. The head of the company is said to be one of the best openair speakers of Canada. He has thrilled thousands durning the brief tour of the

If the Black Watch troop is brought here the only expense for the liberty republicans and democrats when the loan organization will be one meal for the men. The government is paying other expenses. SPEAKS BEFORE THE

Evansville, Ind., Oct. 11.-More business in the future than can be cared for, more work than workers, but under greatly changed conditions were predicted nere today by B. F. Harris, president of the First National bank of Champaign, Ill., and vice president of the Illinois state council of defense. Mr. Harris spoke before the annual convention of the Indiana Bankers' association in session here. In his address Mr. Harris discussed various phases and problems of the war dealing with the work of "feeding the war," financing the war, and the general attitude of the public toward the war. It should be relatively easy to feed and finance the war "if we all farm, finance or fight," he declared.

Makes Plea to Farmers. Referring to the part of the farmer, Mr. Harris said: "It is an enormous task that confronts our farmers, fighting famine and feeding liberty, and it is our duty and privilege to stand be-He conhind them and our boys." tinued to say the average farmer while a good crop farmer often does not grow the meat he should raise. The farm situation is such in the corn belt, Mr. Harris asserted because of the perentage of tenant farmers that adequate results are not to be had unless there is close co-operation between andlord and tenant, above all in the meat and fertility campaign.

The Only Cheap Things. Mr. Harris continued: "Money and farm land, next to congressional oratory and advice are the only cheap things I think of today and this situation means much to the farmer, whose prices are excellent. Except for labor shortage, which threatens to upset many calculations and is more serious than is generally realized we farmers have less reason for complaint than any class of business. Our profits can go to liberty bonds, farm development and debt reduction.

Discussing how lberty bonds should be paid for, Mr. Harris said that noney saved and in bank or savings accounts should not be withdrawn to pay for the bonds. The subscriptions should be paid by additional savings. In that way business is not disturbed and the habit of thrift further en-

The husband lingered a bit too long above the hurnished railings on Wednesday and came home a little unsteady, it was testified in police court, Thursday morning. He made a ruth less raid on the kitchen. He shattered every dish which reposed on the kitchen table. He smashed the face of the kitchen clock. He left the place in a state that would do credit to a German scouting party.

Ther he started for the parlor. "I didn't say anything as long as he stayed in the kitchen," Mrs. Layton

testified. She called police when her husband made his way into the realm of enlarged pictures and gilt edged sea shells. Officers hurried to the home. There was the treading on numberless pieces of broken chinaware as the men crossed the kitchen floor. They arrested Layton on a disorderly conduct

charge. The husband is the father of five children and has been in Fort Wayno for seven years, he said. He promised to spend more of his time at home. He

tion Services. At the meeting of the northern Indiana

son street Thursday, it was voted unanimously to merge with the other branches

This proposition is to unite the three large divisions of the English Lutheran church, which separated at a meeting held at the Trinity Lutheran church of this city back in 1866. The district synod in session here is the ninth unit out of the twenty-five district synods composing the general synod to vote on

the proposed merger.

At the meeting Thursday morning a number of interesting and helpful talks were given by the Rev. Dr. Yarger, president of the board of church and of home missions; Rev. Dr. Charles S. Bauslin, general secretary of the board of educa-tion, and Mr. Weller, of the Jaymen. These men all spoke highly in favor of the joining of the three synods, namely, to load, sight and fire; the theory of the general synod, the general council windage, elevation and the like. With greater means of promoting Lutheran efficiency.

Will End Tonight.

The closing services of Thursday night are to be a very unusual treat. Three young men are to be ordained into the English Lutheran ministry, and as the liturgical service is to be used it will be well worth seeing. The financial report showed the synod the strongest it had ever been. Thirty-two churches reported an excess of their apportionment, while fifteen more had the full amount.

Celebrating Reformation. The convention of the Northern Indiana and Southern Michigan General Synod is celebrating the 400th anniversary of the Reformation. Many of the speakers have dealt at great length on the relation of the Reformation and Luther to present day condi-

It has been decided to open a number of churches on the borders of the synod. There is an opening for at least ten churches in Detroit alone. A new church was opened there a few an office on any of these new church boards or councils to be elected twice in succession. A movement was also eign missions. Along this line it was general synod for educational institu-

tions in India.

One of the most interesting address es of the meeting was delivered by the Rev. Dr. David H. Bauslin, dean of th Hamma Divinity school, Springfield Ohio, on the subject "Some Lessons from the Quadricentennial Reforma tion for Today." The speaker spoke first of the 400th anniversary and its relation to Christianity and civilization. He talked further on the supremacy of the scripture, and justifi cation by faith alone, the universal priesthood of believers, which means that every man is a priest and king before God. He touched on the right of private judgment as fundamental to democracy and said that all the civil institutions of the country, such as the public schools, representative government, etc., had their origin in ther's reformation. He closed with at eloquent appeal for a revived popular and devotional study of the scrip-

Pioneer in Movement. Dr. Bauslin is one of the pioneers and hardest workers of the general synod on the plan of merging the three big divisions of the English Lutheran church. The plan as mentioned in Wednesday's Sentinel is to merge the three synods which separated at a previous meeting in Fort Wayne, held at the Trinity church during the year 1866. These three are: The General Synod, the Northern Indiana and Southern Michigan district meeting now at the Christ Lutheran church being a part of this General Synod, the General Council, and the United Synod of the south. A bit of Lutherar history shows that the rupture in the is a result of a number of different tendencies coming to a crisis at this meeting. The discussions held at that time were friendly but nevertheless severe and the result was the division tricts were raised from \$1.95 to \$2.40 of the Lutheran synod into the two divisions: The General Synod and the General Council. The leading mer who were in favor of the break at that time were Dr. S. S. Schmucher Dr. J. A. Sprecher, Dr. W. A. Passvant Rev. Dr. J. A. Brown, and the Rev. Dr. J. A. Seiss. All of these men are dead

### REAL TESTS ON THE **GRIDIRON THIS WEEK**

Elevens of the "Big Ten" Will Give Flash of Form Saturday.

Chicago, Oct. 11.-With practice games out of the way, football elevens of the "Big Ten" will face the first severe tests of the season in contests to be decided Saturday, Oct. 13. Every member of the Western Conference will get into action. Development has been rapid in almost all of the camps, and with the shortage of material generally felt, some close battles are ex-

The greatest interest is attached to the Ohio State-Northwestern game at Columbus as it will be the first clash between Big Ten teams this year and the loser will be eliminated from the championship. These two elevens fought it out for the Western Conference championship last fall, and Ohio annexed the honors. The Buckeye team is virtually as strong, if not stronger, this year. Critics believe it will be a certain contender for the title again as "Chick" Harley, an All-American selection, is playing with the same dash and speed which characterized his work last fall.

Northwestern, on the contrary, has been seriously weakened as a result of enlistments and injuries. Coach Fred Murphy was forced to build his squad around three or four veterans. Although the Purple team cleaned up on Lake Forest rather easily last Saturday, Murphy is not optimistic concerning the team's chances against Ohio, which, in its two early season zames, has displayed high scoring

Little news has come from the Chicago camp since practice was started three weeks ago and the strength of the remarkably youthful squad is unknown. Stagg's team of a year ago was riddled by enlistments in military service. Illinois evidently expects to triumph over Oklahoma Saturday for Coach Zuppke of the downstate university is week late. The Illini came out of the serious injury. Although Zuppke anticipates a victory over Oklahoma, he figures on a c lose contest as the visiting eleven has been rolling up large

scores over its opponents. The first two games played by Indiana indicate that Coach Stiehm has developed a "scrappy" eleven even with a shortage of material. The playin fairly good condition and hold no tenr of St. Louis university, which is Saturday. The game was called off a levre, whose leg was damaged in the clash against Wabash, probably will be held in reserve until the Minnesota game.

Friars Propose to Have the Best Independent Team in the Country.

The Friar management has assurances of securing two or three new men an effort to strengthen their already strong football aggregation. Manager Fishering is going on the theory that the best is none too good for the loyal football fans of Fort Wayne. However, the fans should not lose sight

of the fact that the Friar team in the field last Sunday would have defeated any aggregation that has ever before played here. the task the scrubbers have before er and he is proud of his house, to

to floor. The trio set up their mechanical workman and fill the water tank from one of the frequent stations set in closets, where basins with running water give an inexhaustible supply, then the electricity is turned on and the big circular brush begins the task of licking up the dust and dirt that is carried into the building by thousands of feet each day.

The brush is turned with a rotary motion, the most efficient in loosening dirt, and before the sprinkler is a tank of liquid soap and powder that distributes an even deposit. The man who manipulates the machine walks up and down the hall until no space, however remote, is left untouched. The machine has a hundred feet of cord attached to a spool which automatically winds and unwinds as it comes nearer to or goes farther from the socket to which it is attached.

After the powerful machine comes the second man with a mechanical squeegee, attached to a vacuum contrivance which pumps the water into a tank on the same machine. One does not imagine that the halls, which apparently are clean even before the scrubmen begin their work, have the amount of dirt from a day's deposit that they actually have. The squeegees suck in gallons of water that one wouldn't besitate to call "black," but after the inenorable scrubber has done its work, one could "cat off the floor" with a merry relish.

Behind the squeegee comes one of the homemade mops. An enormous affair that a woman would lift with no little effort. It is wielded by the hands of a strong man in the final drying off of the wet marble floors.

#### Nacuum Cleaning.

Inside the offices the charwomen are, with the true housekeeper's instinct, setting things to rights. With cloths and a liquid preparation, furnithre is being made like new, waste paper baskets are being emptied, trash removed, desks cleared off, and with a vacuum cleaner on the rugs and a mop on the tiled floors things soon become neater, quite, than any pin.

The vacuum force is generated by plants in the basement of the building. There are four plants altogether and each is capable of maintaining four machines at one time, so that sixteen cleaners may be used at the same time. Each machine has 100 feet of hose attached, and ten outlets or connection tubes are installed on every floor, which enables the machine to be used in every corner of the whole building. The nightly duties of each of the

After a thorough cleaning, the windows are lowered and the lights extinguished, and a report on every room entered is handed into the office of the building manager.

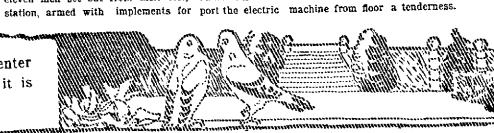

At 9 o'clock, when the curfew warns the little ones that bedtime has come and the town should settle down to nature's sweet sleep, the buzz of the vacuum cleaners dies, the twinkle of lights fades, the clatter of pails ceases, doors are locked and keys are once more hung in their cabinet up in the penthouse. In the women's locker room there is a hurried changing of clothing and, all the while a buzzing of voices as the charwomen discuss their adventures in the offices of industrial kings. The supply rooms are closed and the force of workers trail out into the night.

In the building, however, the swish of water on marble floors may still be heard, the chug-chug of the squeeges following close after, as it gulps up the dirty water, and the thud of the huge mops thumping against the floor

Authority to assume supervision over the leading articles of diet is vested in Herbert Hoover by a proclamation of President Wilson.

Under the terms of the order, li-censes will be required for the manutribution of flour, bread, rice, staples, September 11, 1817, and that on Octofacture, storage, importation and disregetables and other stipulated commodities. Farmers and small dealers specifically are exempted.

Decision to extend government control to the food stuffs named was founded on determination to prevent unusual profits and eliminate hearding and speculation.

Government control of foodstuffs is extended to take in virtually all the essential articles of dist by a proclamation issued last night by President Wilson directing the food administration to license, after Nov. 1, the manufacture, storage, importation and distribution of some twenty prime commodities. Many small dealers are exampted, as are farmers, who were esnecially excepted in the food control

The move was forcast in a state ment last night by the food administration declaring it was necessary to prevent unreasonable profits and to stop hoarding and speculation.

After quoting the food control act, under which the action is taken, the president's proclamation says: essential, in order to carry into effect the purposes of said act, to license the importation, manufacture, storage and distribution of necessaries to the extent hereinafter specified.

# Waking Up!

This is the general waking up time of the world. All the nations are becoming acutely conscious of their weaknesses and deficiencies. There is nothing like a terrible war to jolt people out of their lethargy and make them see things as they are. And war has also another good effect. It makes people economize and forces them to seek out the best ways to save. The conscientious use of the Want Ads is helping many housewives in this community to effect savings in their household

affairs that they could not accomplish in any other way. If you have not tried them yet-get busy now. Use the Want Ads for economy. With an Ad in The Sentinel you can talk to more than 75% of the people living in Fort Wayne. Telephone Your ) PHONE Want Ads to THE SENTINEL

#### Wise People Are Buying Winter Blankets Here and Now

Good blankets today are an investment, such as they have never been before. The one thing almost certain about them is that they are not going to be cheaper. We foresaw a scarcity in the market coming and bought heavily, with the result

that we have in our possession more Blankets than ever before in our history. But our customers are going to need every pair we own. The prices marked on these Blankets mean a decided advantage to home-

You will find us ready to supply Blankets of assured quality, standard sizes and weights. And, remember, it was never so important to be forchanded as now.

Daniel H. Wallace was arrested at South Bend several months ago, but was HEARING AT GRAND RAPIDS. Grand Rapids, Mich., Oct. 11.-Testimony was offered by the government to-day at the trial in United States district

court of Adolph Germer and twelve other persons, to sustain its contention that the defendants were responsible for the circulation of anti-draft literature. The charge against the defendants, most of whom are socialists, is conspiracy to defeat the purpose of the selective draft law. It is alleged that most of the anti-draft pamphlets were printed in Chicago. South Bend, Ind., Oct. 11.—The an-nual meeting of the real estate men of congress last April which touched upon Indiana will be held in South Bend the necessity for an increased army, was introduced as evidence by the govern-ment, after objections of the defense had been overruled.
